

Career Services Assignment: Student Intro Survey

Career Services is an integral part of Coding Dojo's programs, and we're here to help you prepare for and undergo the job search. Think of us as the vehicle you can utilize to kickstart your journey into a career in development!

Career Services provides resources and assistance in all aspects of the career development and job search processes. All former and current students, faculty, and alumni are invited to utilize our services.

The mission of Career Services is to support the institution's purpose of educating individuals to become self-sufficient developers in their respective markets' by serving as a liaison between students, alumni and the world of work. We commit to providing meaningful career counseling as well as up-to-date job search coaching, résumé and cover letter writing strategies, hiring trends, resources and more.

But before we jump any further into Career Services, we would love to know a little bit more about you! Please take some time to fill out the survey below to the best of your ability. If you have any questions, or need some clarity on any of the questions below, please let us know. We're here to help!

Instructions:

Please complete the below survey *prior to the Career Services group intro session*, which will occur on *Friday of Programming Basics*, and submit it to your CSM.

- If you're not sure who your CSM is, check your email inbox for the *Career Services welcome email*, which goes out on the first day of the program (Subject line: Welcome from Career Services + Group Intro). The person who signed that email is your CSM!
- If you can't find the welcome email or are still unclear as to who your CSM is, please send an inquiry to our general email address: csm@codingdojo.com.

Personal Info:

Full Name:

Benjamin L. Evans Jr.

Email Address (the one you registered for the program with) / Phone Number (Optional):

b3n3vans@gmail.com

816-835-4926

Current Place of Residence (City, State):

Kansas City, MO

Preferred Pronouns (We'd love to know how to respectfully refer to you!)

--

Highest Level of Education Completed:

High School ▾

For Post-Secondary Education, Please List Degrees:

Career Info:

In a paragraph or less, please describe your prior professional experience (*any* experience, not just technical):

No prior technical working experience.

Once you've completed the program, what type of role do you hope for? The options are:

Onsite, remote, hybrid (you can list more than one):

hybrid

Please describe what led you to join the bootcamp? Paint us the picture of why you're pursuing a career in development:

I joined the dojo in pursuit of a career change that requires less physical labor.

What are your goals for after the program? Are there any industries within the overall tech space you're interested in? What sort of company would you like to land at? What in the tech space excited you? (If you're not sure, you can just say, "I'm not sure!"):

My goals after completing the bootcamp are to immediately begin job hunting for a junior level software engineering position or internship. I am interested in the startup culture within the tech industry but I'd like to gain experience witnessing how a successful company is operated prior to venturing into the startup space. What's exciting to me in the tech space is the variety of projects that are available to work on. In this industry I would assume developers could be building new applications often to continue to solve problems within people's lives.

That's it! *Don't forget to submit this survey to your CSM* (see instructions at the top of the doc.) Thanks so much!
